3 Fire Calls

Appomattox firemen have responded to three calls in the past few days. The first was April 16 when a dump truck backed into a high voltage wire. The second was Friday at 4:30 a.m. when two pumpers went to Appomattox Garment Co, but found no fire. The same automatic tape system signaled an alarm again Monday morning at 4:30, according to fireman Harold Carter, and once again trucks went to the Garment Co, but found no fire. Technicians are at work to correct the system.

Demand Boosts Soybean Sales

American soybean producers are selling record quantities of soybeans both at home and abroad this year, according to J. P. Alvis, Jr., Chairman of the Appomattox County Agricultural Stabilization and Conservation (ASC) Committee.

It is estimated that soybean utilization will increase from 945 million bushels used in 1969 to 1,136 million bushels for this year. This increase in market demand for soybeans represents the production from about 7 million acres.

"In view of the excess production capacity we have in this country, this growth in soybean demand is welcome news to soybean producers and taxpayers," Chairman Alvis commented.

During the period 1966-68 and part of 1969, soybean supplies tended to increase as a result of increased competition from lower-priced imports of fish meal, sunflower oil and other competitive protein substitutes.

However, in recent months demand for soybeans has increased substantially as a result of more competitive pricing a drop-off in supplies of other high-protein materials, and continued growth in world demand for protein feeds.

As a result of the increased demand at higher prices, soybean producers who placed their crop under loan last fall have been redeeming them prior to the loan maturity date and moving them into the open market, the chairman pointed out.

In past years, with less favorable markets, farmers have tended to leave their beans under loan until the loan maturity date. Reversal of this trend will result in a substantial saving to the government and therefore to taxpayers.

"Increased exports have been and will continue to be, the key to large growth markets for soybeans," Mr. Alvis pointed out.

"Soybeans supply more than four pounds of meal for each pound of oil, while most other vegetable oil products supply about a pound of oil for each pound of meal. The demand for meal is increasing faster than the demand for oil, and this in turn creates a demand for soybeans both in the U. S. and aboard," he explained.

Kills Gobbler With Three Beards

Saturday was the first day of spring gobbler season and Wayne Cyrus, of Roanoke, was up early . . . and shooting as the photo indicates. This gobbler weighs 16 1/2 pounds and is unusual in that he has three distinct "beards". Wayne's wife has never cooked wild turkey, he said, but this would give her a good opportunity. Wayne, just returned to civilian life, saw service in Vietnam with the 1st Logistical Command. He is the grandson of Mr. and Mrs. W. H. Almond, of Appomattox.
